Problems of Modern Mathematical Physics – PMMP'26

February 18, Wednesday

Conference Hall, 2nd floor

Chairperson: **10:00-11:00 – Ioseph Buchbinder**

11:30-13:00 – Sergey Fedoruk

14:30-16:00 – Yurii Zinoviev

16:30-18:30 – Sergey Derkachov

Didenko and Zaigraev swapped places in the programme

10:00-10:30	**Yurii Zinoviev** On massive higher spins and gravity
10:30-11:00	**Evgeny Ivanov** AdS Harmonic Superspace
11:00-11:30	***Coffee Break***
11:30-12:00	**Nikita Zaigraev** N=2 conformal higher spin theories in the harmonic superspace
12:00-12:30	**Nikita Misuna** Unfolded hypermultiplet in harmonic superspace
12:30-13:00	**Andrey Morozov** Entangling gates from cabling of knots
13:00-14:30	***Lunch Break***
14:30-15:00	**Slava Didenko** On irregular higher-spin generating equations
15:00-15:15	**Danila Valerev** Differential contracting homotopy
15:15-15:30	**Philipp Kirakosiants** Differential homotopy approach in higher spin theory
15:30-15:45	**Ilgam Faliakhov** Symmetry breaking in the self-dual higher-spin theory
15:45-16:00	**Alexander Solomin** Chiral Higher Spin Theories and Generalized Self-Dual Double Copy
16:00-16:30	***Coffee Break***
16:30-17:30	**Mikhail Vasiliev** Теория высших спинов за час
17:30-18:30	**Sergey Mironov** Аффинные алгебры
