

# The 6th International Conference "Distributed Computing and Grid-technologies in Science and Education"

Contribution ID: 39

Type: **sectional reports**

## **Monitoring and services of CMS Remote Operational Center in JINR (Dubna).**

The efficient operation of the CMS Remote Operational Center require sophisticated tools for the monitoring of local computing infrastructure. A lot of parameters have to be monitored, such as CPU time, users activity, used disk space etc. Special services should be installed and configured to access experimental data from CMS.
