

The 6th International Conference "Distributed Computing and Grid-technologies in Science and Education"

Contribution ID: 66

Type: **plenary reports**

Optimization problems in distributed computing environment

Thursday, 3 July 2014 09:30 (30 minutes)

The report focuses on technologies for solving optimization problems in distributed computing s. There are discussed new and traditional approaches to problem solving in the report. Also there are consideration the problems as finite-dimensional so and dynamic optimization.

Primary author: Prof. AFANASIEV, Alexander (IITP RAS)

Co-author: Mr VOLOSHINOV, Vladimir (Institute for Information Transmission Problems RAS)

Presenters: Prof. AFANASIEV, Alexander (IITP RAS); Mr VOLOSHINOV, Vladimir (Institute for Information Transmission Problems RAS)

Session Classification: Plenary

Track Classification: Section 8 - Optimization problems and distributed computing
