

The 6th International Conference "Distributed Computing and Grid-technologies in Science and Education"

Contribution ID: 19

Type: plenary reports

RDMS CMS Computing: Current Status and Plans

Wednesday, 2 July 2014 12:10 (15 minutes)

The Compact Muon Solenoid (CMS) is a high-performance general-purpose detector at the Large Hadron Collider (LHC) at CERN. More than twenty institutes from Russia and Joint Institute for Nuclear Research (JINR) are involved in Russia and Dubna Member States (RDMS) CMS Collaboration. A proper computing grid-infrastructure has been constructed at the RDMS institutes for the participation in the running phase of the CMS experiment. Current status of RDMS CMS computing and plans of its development to the next LHC start in 2015 are presented.

Primary authors: Dr TIKHONENKO, Elena (JINR); Dr GOLUTVIN, Igor (JINR); Dr LEVCHUK, Leonid (KIPT, Kharkov, Ukraine); Dr KODOLOVA, Olga (SINP MSU); Dr SHMATOV, Sergey (JINR); Mr ZHILTSOV, Victor (JINR); Dr GAVRILOV, Vladimir (ITEP); Dr KORENKOV, Vladimir (JINR)

Presenter: Dr TIKHONENKO, Elena (JINR)

Session Classification: Plenary

Track Classification: Section 1 - Technologies, architectures, models, methods and experiences of building distributed computing systems. Consolidation and integration of distributed resources
