Session Program

24 November 2026

Молодежные премии ОИЯИ // AYSS JINR Awards

Научно-исследовательские экспериментальные работы

УНЦ / ЛИТ, 475 каб.

Tuesday 24 November

10:00

Научно-исследовательские экспериментальные работы

Session | **Location:** УНЦ / ЛИТ, 475 каб.

10:00–10:15

237Np+48Ca REACTION AND DECAY PROPERTIES OF 282Nh AND DESCENDANT NUCLEI AT DGFRS-2

Speaker
Ege Karanfil

10:15–10:30

Implementation of the Booster accelerating system operation mode for ion accumulation using electron cooling and RF voltage flattening by adding the second harmonic of the revolution frequency

Speaker
Mr Андрей Троицкий

10:30–10:45

Effect of the DNA-dependent protein kinase inhibitor NU7026 on the radiosensitivity of B16 mouse melanoma cells

Speaker
Александра Ясинская

10:45–11:00

Amplitude Analysis of B0 and Bs decays at the ATLAS experiment

Speaker
Артём Васюков

11:00–11:15

Analysis of vesicular medicines structure

Speaker
Varvara Chausova

11:15–11:30

The Modifying Effects of DNA Repair inhibitors on DNA Damage Induction in Cancer Cells

Speaker
Регина Кожина

11:30
