## **Analysis of the possibility of studying the asymmetry of pions production in collisions of transversely polarized protons and deuterons at the VBLHEP-JINR facilities**

*Wednesday, 11 July 2018 16:30 (30 minutes)*

Collisions of transversely polarized nucleons are of interest for understanding their structure. In the report, we discuss the possibilities of studying the asymmetry of pions production in collisions of transversely polarized protons and deuterons on the MPD detector, which is created in JINR.

**Presenter:** Prof. LITVINENKO, Anatoly (Joint Institute for Nuclear Research, Veksler and Baldin Laboratory of High Energy Physics)

**Session Classification:** Spin physics experiments II
