

## **Study of interaction of charged light particles with 1p shell nuclei**

*Wednesday, 17 April 2019 17:00 (15 minutes)*

The work is devoted to experimental and theoretical study of charged light particles elastic and inelastic scattering processes from  $^9\text{Be}$ ,  $^{11}\text{B}$  and  $^{12}\text{C}$  nuclei by measuring differential cross sections of these processes and their further analysis.
