## The XXIII International Scientific Conference of Young Scientists and Specialists (AYSS-2019)

Contribution ID: 503 Type: not specified

## Panda Muon System Prototype

Thursday, 18 April 2019 18:15 (15 minutes)

The PANDA Experiment will be one of the key experiments at the Facility for Antiproton and Ion Research (FAIR) which is under construction now in the territory of the GSI Helmholtz Centre for Heavy Ion Research in Darmstadt, Germany. PANDA is aimed to study hadron spectroscopy and various topics of the weak and strong forces. Muon System is chosen as the most suitable technology for detecting the muons. The Prototype of the PANDA Muon System is installed on the test beam line T9 at the Proton Synchrotron (PS) at CERN. Status of the PANDA Muon System prototype is presented with few preliminary results.

Presenter: Dr VERKHEEV, Alexander (JINR)

Session Classification: High energy physics
