

9th International Conference "Distributed Computing and Grid Technologies in Science and Education" (GRID'2021)

Contribution ID: 89

Type: Sectional reports

## COMPASS production system: Frontera experience

*Monday, 5 July 2021 16:15 (15 minutes)*

Since 2019, the COMPASS experiment works on the Frontera high performance computer. This is a large machine (number 5 in the ranking of the most powerful supercomputers in 2019) and details, problems, and approaches to organizing data processing on this machine are presented in this report.

### Summary

**Primary author:** PETROSYAN, Artem (JINR)

**Presenter:** PETROSYAN, Artem (JINR)

**Session Classification:** Distributed computing systems

**Track Classification:** 1. Distributed computing systems
