Jira plugin for ALICE instance

Thursday, 8 July 2021 15:30 (15 minutes)

As a bug tracking and project management system, the ALICE experiment uses Jira software, which provides a wide range of configuration options. Jira also allows to significantly expand the basic functionality with custom plugins. In this work, the LinkedIssuesHasStatus plugin for the JIRA service of the ALICE experiment is developed and implemented. Plugin returns tickets that have linked issues which are in the specified status and that are linked with the specified linking type.

Summary

Primary authors: KONDRATYEV, Andrey (JINR); BONDYAKOV, Aleksey (JINR (Joint Institute For Nuclear Research))

Presenter: KONDRATYEV, Andrey (JINR)

Session Classification: Distributed computing systems

Track Classification: 1. Distributed computing systems
