

A new service implemented on the HybriLIT platform

Tuesday, 10 November 2020 14:00 (15 minutes)

With the increase of users of the HybriLIT heterogeneous platform, the development of new services for users remains the key task.

Today we have an environment of information services for users of the platform which help organize work in the system in a more efficient way.

This report presents a new developed and implemented service for the users of the HybriLIT platform.
