Content (v.1.3)

1. Introduction
   - 1.1 The MPD experiment
     - 1.1.1 Perspectives for the research program of the MPD experiment
   - 1.2 The ALICE ITS2 first tracker totally based on MAPS Technology
   - 1.3 Tracking in MPD
     - 1.3.1 The TPC
     - 1.3.2 The ITS

       ITS Functions

       Physics of the ITS

       Production of low-momentum heavy hyperons and particles with open charm.

       Production Hyper- and super-nuclei.

2. Pixel Chips
   - 2.1 The ALPIDE sensor from the ALICE ITS2
   - 2.2 Detector technology
   - 2.3 Principle of operation
     - 2.3.1 Particle detection
     - 2.3.2 Read-out
   - 2.4 Radiation hardness

3. Detector layout

   The two stages construction scenario
   - 3.1 Outer Barrel Stave
   - 3.2 Supporting mechanics

     Material budget

     Simulations results
   - 3.3 Supporting cooling

     Material budget

     Simulation results
   - 3.4 Outer barrel FPC
   - 3.5 Pixel Chip to FPC connection
   - 3.6 Assembly procedures
     - 3.6.1 Outer Barrel HIC assembly
       - 3.6.1.1 HIC Test and characterization
     - 3.6.2 Outer Barrel Stave assembly
       - 3.6.2.1 Stave test and characterization

4. Support structure and system integration
   - 4.1 Services
   - 4.2 Beam pipe
   - 4.3 Installation and Removal

5. The DAQ system
   - 5.1 Radiation environment

5.1.1 Beam from the NICA collider
5.1.2 Radiation levels in the detector regions
5.2 The GBTx-emulating boards
5.3 The receiver at the nodes of online farm (Gbtx Emulator Readout Interface)
5.4 Integration of the ITS DAQ into the MPD DAQ

6. The MPD IT finalization (stage2: the Inner Barrel)

7. Detector performance
7.1 The MPD TPC in a nutshell
7.2 Simulations of the TPC – ITS tracking system
MPD beam pipe
7.3 Track reconstruction efficiency
7.4 Momentum resolution
7.5 Phase space coverage for protons and pions
7.6 Conclusions

8. Physics performance
8.1 Simulation methods and conditions
8.2 Strange particles reconstruction
8.2.1 Expected yields
8.2.2 (…)
8.3 Charmed particles reconstruction
8.3.1 Expected yields
8.3.2 (…)

9. Project organization and time lines
