

Contribution ID: 107

Type: not specified

The studies of the monolithic active pixel sensors characteristics and investigations of new ultra-lightweight support and cooling carbon-fiber structures with high radiation transparency for MPD vertex detector

Friday, 23 October 2020 17:00 (20 minutes)

RFBR grant 18-02-40075

Presenter: NESTEROV, Dmitrii (St Petersburg State University)

Session Classification: Parallel session IV
