

Contribution ID: 22

Type: not specified

Study of production features, modeling and optimization of algorithms for reconstruction of short-lived hadron resonances in the MPD experimental setup at the NICA collider

Thursday, 22 October 2020 12:00 (25 minutes)

RFBR grant 18-02-40038

Presenter: RIABOV, Viktor (PNPI)

Session Classification: Precision tracking and the production of light hadrons, strangeness, hyper-nuclei, and heavy-flavor
