Investigation of parity nonconservation processes in the scattering of longitudinally polarized protons by a deuteron

Tuesday, 20 October 2020 17:45 (25 minutes)

RFBR grant 18-02-40092

Tests of Fundamental Symmetries at NICA A feasibility of precision tests of the Standard Model and Beyond in polarization experiments at NICA will be reviewed with an emphasis on internal target experiments with precessing horizontal polarization of stored protons and deuterons.

Co-authors: NIKOLAEV, Nikolai (Landau Institute for Theoretical Physics); SHATUNOV, Yuri (Budker institute of nuclear physics)

Presenter: NIKOLAEV, Nikolai (Landau Institute for Theoretical Physics)

Session Classification: Theoretical studies of the dense baryonic matter produced in heavy-ion collisions at NICA
