

Physics programme for the first stage of the NICA SPD experiment

Monday, October 5, 2020 - Tuesday, October 6, 2020

Scientific Program

We discuss the following topics:

Polarized phenomena in p-p, p-d and d-d scattering

Multiquark configurations and/or short-range correlations in nuclei, color transparency

Phenomenological models of pp and pn interactions

Light nuclei collisions

Hypernuclei

Physics beyond the Standard model
