

## СПИСОК ОСНОВНЫХ ПУБЛИКАЦИЙ Баймухановой Аягоз

1. Sorption of various elements on ion-exchange resins in acetic media. J. Dadakhanov, A. Marinova, A. Baimukhanova et.al. Journal of radioanalytical and nuclear chemistry (2021). Published online. DOI: 10.1007/s10967-021-07600-7.
1. Distribution coefficients of 60 elements on cation and anion-exchange resin in ammonium chloride solutions. N. Mirzayev, A. Marinova, G. Marinov et.al. Solvent extraction and ion exchange (2019), 37(2), pp 1-15. DOI: 10.1080/07366299.2019.1679458.
2. An alternative separation strategy for the isolation of Ac and Ra isotopes from thorium targets irradiated with high energy protons. A. Baimukhanova, V. Radchenko, G. Marinov et.al. The third International Symposium on Technetium and other Radiometals in Chemistry and Medicine (Terachem 2018). DOI: 10.13140/RG.2.2.33997.90088.
3.  $^{172}\text{Hf} \rightarrow ^{172}\text{Lu}$  radionuclide generator based on a reverse-tandem separation scheme. J. A. Dadakhanov, N. A. Lebedev, A. Velichkov et.al. Radiochemistry (2018), 60(4), pp 415-426. DOI:10.1134/S1066362218040112.
4. Production of the positron-emitting radionuclide  $^{68}\text{Ga}$ : the radiochemical scheme of radionuclide generator  $^{68}\text{Ge} \rightarrow ^{68}\text{Ga}$ . A. E. Baimukhanova, Y. T. Chakrova, D. V. Karaivanov et.al. Chemical bulletin of kazakh national university (2018), 2(89), pp 20-26. DOI:10.15328/cb1003.
5. Utilization of (p, 4n) reaction for  $^{86}\text{Zr}$  production with medium energy protons and development of a  $^{86}\text{Zr} \rightarrow ^{86}\text{Y}$  radionuclide generator. A. Baimukhanova, V. Radchenko, J. Kozempel et.al. Journal of radioanalytical and nuclear chemistry (2018) 316, p 191. DOI: 10.1007/s10967-018-5730-7.
6. Effect of ionic liquid on the extraction of actinides and lanthanides with 1, 2, 3-triazole-modified carbamoylmethylphosphine oxide from nitric acid solutions. A. Turanov, V. Karandashev, E. Sharova et.al. Radiochimica acta (2018) 106 (5), pp 355-362. DOI: 10.1515/ract-2017-2851.
7. The KLM+KLN Auger electron spectrum of rubidium in different matrices. A. Kh. Inoyatov, A. Kovalík, L. Perevoshchikov et.al. Journal of physics B: Atomic, Molecular and Optical Physics (2017) 50, 15, 155001. DOI: 10.1088/1361-6455/aa7990.
8. Improved energy of the 21.5 keV M1+E2 nuclear transition in  $^{151}\text{Eu}$ . A. Kh. Inoyatov, A. Kovalík, D.V. Filosofov et.al. European physical journal A (2016) 52, 5, p 133. DOI: 10.1140/epja/i2016-16133-y.
9. Direct flow separation strategy, to isolate no-carrier-added  $^{90}\text{Nb}$  from irradiated Mo or Zr targets. V. Radchenko, D.V. Filosofov, J. Dadakhanov et.al. Radiochimica acta (2016) 104, 9, p 625. DOI: 10.1515/ract-2015-2543.
10. Study of  $^9\text{Be} (^3\text{He}, d) ^{10}\text{B}$  reaction. N. Burtebayev, M. K. Baktybayev, J. T. Burtebayeva et.al. VII Eurasian Conference "Nuclear science and its application", 21-24 October 2014, Baku, Azerbaijan.
11. Analysis of differential cross section of the process  $^9\text{Be} (p, p) ^9\text{Be}$  proceeding at low energies in the optical model. N. Burtebayev, M. K. Baktybayev, Zh. K. Kerimkulov et.al. VII Eurasian Conference "Nuclear science and its application", 21-24 October 2014, Baku, Azerbaijan.
12. A new measurement and analysis of the reaction  $^7\text{Li} (d, t) ^6\text{Li}$  at 25 MeV. N. Burtebayev, A. Amar, Zh.K. Kerimkulov et.al. NNC RK bulletin: Research and technology review (2012) 3 (51), pp 60-65.

11.03.2021
