

Drell-Yan angular coefficients measurements with the CMS experiment at the LHC

Friday, 15 October 2021 10:45 (15 minutes)

Updated results of measurements of angular coefficients for Z bosons produced in pp collisions and decaying to $\mu^+\mu^-$ is presented. Results of MC simulation and data collected by the CMS detector during the LHC Run-I (2011-2012) and Run-II (2016-2018) were used.
