Short overview of the ELI-NP detector arrays

Tuesday, 26 October 2021 14:15 (30 minutes)

The instrumentation, which is under construction at ELI-NP, will be presented with an emphasis of the parameters of the detectors. These include the ELIADE HPGe Clover array, the ELIGANTs - ELIGANT-GN, an array of large-volume scintillators and neutron detectors, and ELIGANT-TN, an array of ^3He proportional counters, the ELISSA array of Si DSSDs and the fission detectors, ELI-BIC and ELITHGEM.
