JINR external and local network (Current status)

Thursday, 6 July 2023 14:45 (15 minutes)

The network infrastructure is an integral part of the major research infrastructure project "Multifunctional Information and Computing Complex (MICC) of JINR". The main goal is to provide a guaranteed and reliable traffic transmission that will fully meet the needs of scientific experiments. This presentation provides an overview of the local and external network infrastructure at JINR.
