

Dark and funny facts in the nuclear and particle physics

Tuesday 31 October 2023 21:00 (1 hour)

On Halloween night you will be given a lecture in the dark. There have been many dark spots in the lives of scientists who are the pioneers of particle physics and nuclear physics, but also many funny moments. From the lecture you will learn about funny incidents, dark events and relationships between the great scientists of the past. It will be told how important its majesty of chance is in science.

Presenter: MERTS, Sergei (JINR, LHEP)
