## Summary of collaboration meeting

On the way to testing, debugging

- MW had some progress, and plan for next steps defined:
  - Debugging of interfaces between components and functionality
  - Collecting of requirements for monitoring system
- Applied software
  - More efforts for framework are needed
  - Processing algorithms to be merged with framework
  - List of subsidiary data
- Formalisation of workflows, data processing pipelines

# SPD OnLine Filter

## Debugging requirements

- MC production with incremental growth of simulated data
- Agreed data organisation (to allow different types of debugging)
- Subsidiary data sources: mapping, geometry etc.
