The pilot version of the JINR Publications Repository

Wednesday 30 October 2024 15:35 (15 minutes)

JINR Institutional repository is built on DSPACE software platform. Repository is a hub of results made by JINR employees, showcase of scientific activities of the Institute.

At the first stage we store publication automatically imported via API from eLIBRARY and INSPIREHEP databases from 2019-2024 yy and then we will continue to go feather into the history. The repository allows users to upload their published works themselves, all data submitted by users will be checked by a moderator. Integration with JINR PIN system, a lot of search possibilities and author profile, these and more features will be presented in the talk.
