

## Testing of the multiplayer neutron detector on the LPI neutron channel

*Monday 28 October 2024 18:50 (20 minutes)*

One of the SCAN-3 multilayer neutron detectors on the neutron channel in LPI (Troitsk) has been studied. The photodesintegration reaction of a deuteron was used to form a neutron beam. The report describes the procedure for creating a neutron channel, the channel parameters, as well as the results obtained during the work.
