

MPD performance in the fixed-target mode

Petr Parfenov

Outline

- Introduction
 - Anisotropic flow definition, sensitivity to EoS, motivation
 - MPD layout, production details
- Analysis details
 - Centrality determination
 - PID
 - Scalar product method for v_n measurements
- Results
 - v_n of protons, pions for Bi+Bi @ 2.5, 3, 3.5 GeV
 - Comparison with BM@N performance
- Summary & Outlook
