

# **<p>International Workshop on Spin Physics<br/>at NICA (SPIN-Praha-2018)</p>**

**Monday, 9 July 2018 - Friday, 13 July 2018**

**Charles University, Prague**

## **Scientific Programme**

The scientific program of this workshop will be anchored around the following pillars:

Theoretical and experimental overview of the status of the nucleon spin puzzle, ongoing and upcoming experiments;

NICA spin physics program at the JINR;

Design of the Spin Physics Detector (SPD) at NICA for measurements with polarized proton and deuteron beams and its physics potential;

Practical steps towards setting-up of an international collaboration to design, build and perform experiments with the SPD.

Overview talks as well as specific contributions to the topics above will be foreseen.

A participant who would like to give a talk should contact the scientific secretary of the Program Advisory Committee Dr. Elena Zemlyanichkina ([elena.zemlyanichkina@cern.ch](mailto:elena.zemlyanichkina@cern.ch)) and send to her the title and a short abstract of the contribution. The final program of the event will be compiled by the Committee and made available at this site shortly after the registration has been completed.
