

International Workshop on Spin Physics at NICA (SPIN-Praha-2018)

Wednesday, 11 July 2018

Spin physics experiments II (16:30 - 17:30)

time	[id] title	presenter
16:30	[33] Analysis of the possibility of studying the asymmetry of pions production in collisions of transversely polarized protons and deuterons at the VBLHEP-JINR facilities	Prof. LITVINENKO, Anatoly
17:00	[51] Components of polarization-transfer to a bound proton in a deuteron measured by quasi-elastic scattering	Prof. MARDOR, Israel
