

XXVIth International Baldin Seminar

September 15-20, 2025

Statistics:

- **total number of participants – 237**
- young participants (under 35) – 69**
- **total number of talks – 148, plenary talks – 16**

- **geography:**

JINR, Russia, Belarus, China, Cuba, India, Kazakhstan, Mongolia, Uzbekistan, Slovakia

We are gratitude to all participants!

Many thanks to

- International Advisory Committee
- JINR Directorate
- VBLHEP Directorate
- BLTP Directorate

From co-chairmen many thanks to

- Organizing Committee

Many thanks to

- Secretariat
Molokanova Natalia
Dodonova Lidia
Kutinova Olga
Slautin Mikhail

Many thanks to

- VBLHEP Cafeteria team
for coffee breaks!**
- VBLHEP Canteen team
for Welcome party, Banquet!**

**The Proceedings of the Seminar are planed to
publish in
Physics of Elementary Particles and Atomic Nuclei
v.57 (4) 2026.**

XXVIth International Baldin Seminar on High Energy Physics Problems "Relativistic Nuclear Physics and Quantum Chromodynamics"

Sep 15 – 20, 2025
VBLHEP JINR
Europe/Moscow timezone

Now happening: [Nearly forgotten results in development of physical cosmology](#) (LHEP-215/Conference Hall - Конференц-зал корп. 215)
9:00 AM - 9:40 AM

The XXVIth International Baldin Seminar on High Energy Physics Problems "Relativistic Nuclear Physics and Quantum Chromodynamics", organized by the Joint Institute for Nuclear Research, will be held from September 15 to 20, 2025 in Dubna, Russia.

The Seminar continues the series of traditional meetings that was established by him. Among conferences that were organized by Alexander Mikhailovich Baldin (1926–2001) of special importance is just this series of the International Seminars on High-Energy Physics Problems started in 1969 with the support of M.A. Markov (1908–1994). They have been given an unofficial, somewhat witty, name "Baldin autumn".

The program is supposed to present reports from major experimental collaborations and summaries of major theoretical and experimental advances made in relativistic

nuclear physics.

The Seminar programme will consist of review talks and contributions presenting original researches. The working language of the Seminar is English.
