Session Program

15–19 Jun 2026

International Conference on Condensed Matter Research at the IBR-2 devoted to the 90th anniversary of Yury M. Ostanevich

Opening day 1st session

Monday 15 June

11:30

Opening day 1st session: - Chairman: N. Kucerka

Session | **Location:** 20 Joliot-Curie St., MLIT, Dubna, Moscow Region, Russia, 141980

11:30–12:00

Neutron Scattering Instrumentation for Condensed Matter Research at the IBR-2 Pulsed Reactor: Current State and Further Developments

Speaker
Denis Kozlenko

12:00–12:30

Neutron activation analysis at the IBR-2 reactor: principle and application

Speaker
Inga Zinicovscaia

12:30–12:50

Application of neutron activation analysis for non-destructive elemental characterization of various samples (moss, lichens, plant leaves, soil, road dust, filters, leaf litter, centipedes) indicating environmental pollution – 20 years of collaboration between EPL, Institute of Physics Belgrade and FLNP JINR

Speaker
Mira Aničić Urošević

12:50
