Healthcare

e-Collaboration

Special hardware

Reliable internet connection

Visualization devices

Qualified management and support

Financial efforts!

Challenges

Device fragmentation - processor, memory, screen,...

Os fragmentation - Android, iOS, WP

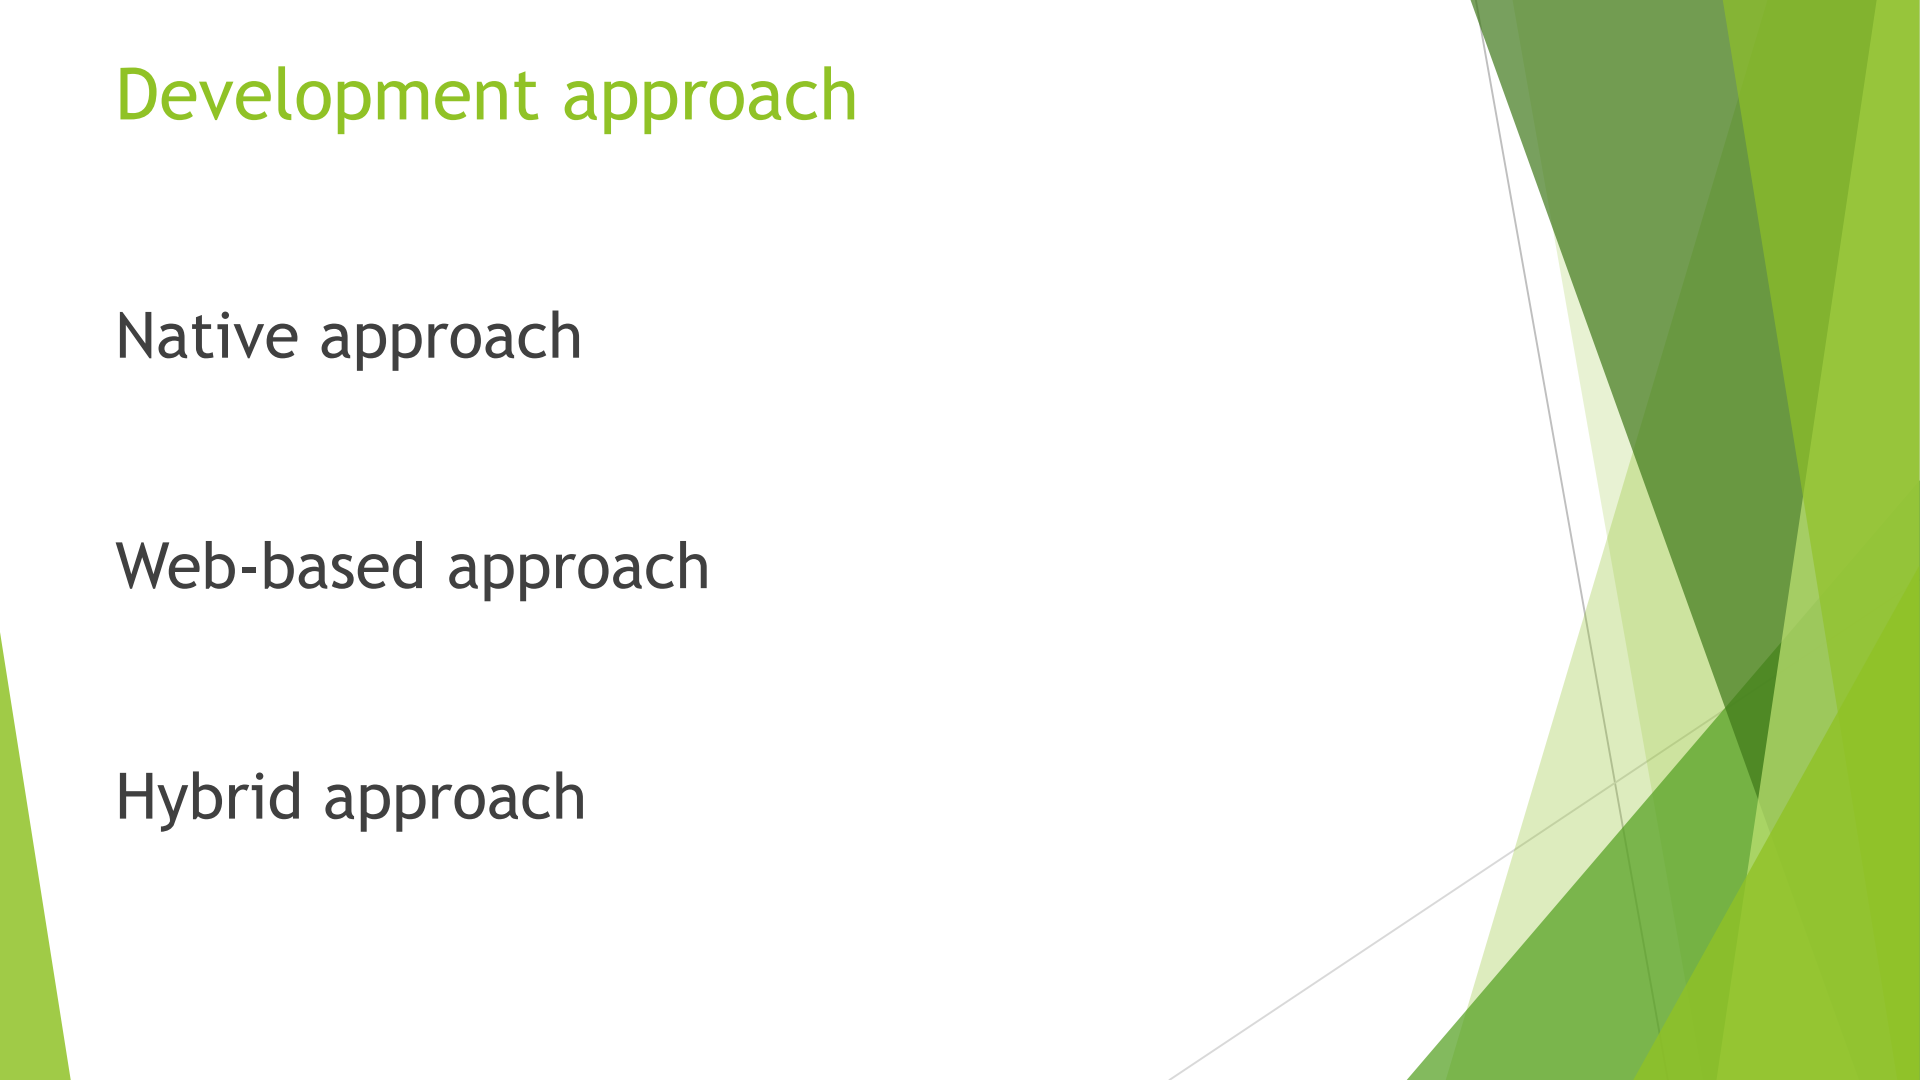

Development approach - Native / Cross-Platform / Hybrid

Development approach

Native approach

Web-based approach

Hybrid approach

Key-points

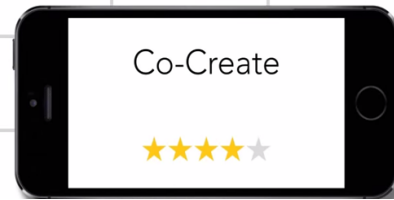

Security

Device-independency

Usability

Creative Collaboration		Efficient Processes		Smart & Secure		Impressive Presentations	
Ideate and co-create ★★★★★	Rate ★★★★★	Better results ★★★★★	Less time ★★★★★	Secure ★★★★★	App Store installation ★★★★★	Visualize ★★★★★	Import pdf ★★★★★
Engage ★★★★★	Decide ★★★★★	Get along .. speakers ★★★★★	Reduce risks ★★★★★	No server ★★★★★	Wireless presentation ★★★★★	Screen Stick ★★★★★	
Inspire each other ★★★★★	Take photos & video clips ★★★★★	Auto mute ★★★★★		No Cloud ★★★★★		Control up to 9 screens ★★★★★	
Share sketches .. drawing apps ★★★★★		Sort & cluster in parallel ★★★★★		No firewall troubles ★★★★★		Wireless presentation ★★★★★	
Share ★★★★★		Safely address contentious areas ★★★★★		Apple, Android, Windows ★★★★★		Mirror your Board	
Report ★★★★★		Open culture & mind ★★★★★		Easy to share ★★★★★			
Analyse ★★★★★		Prepare & Share .. in seconds ★★★★★		Automatic Updates ★★★★★			

The Boards App

Smarter than a whiteboard!

The Cards App

Smarter than sticky notes!

The Screen App

Smarter than a movie screen!

Control up to 9 screens (or projectors)

Advantages

No server necessary	Works on ¹ 	No cloud necessary
Works with & without internet	Runs with personal & mobile hotspot	No firewall troubles
Data is stored on your device only!	Secure 	x10 Faster

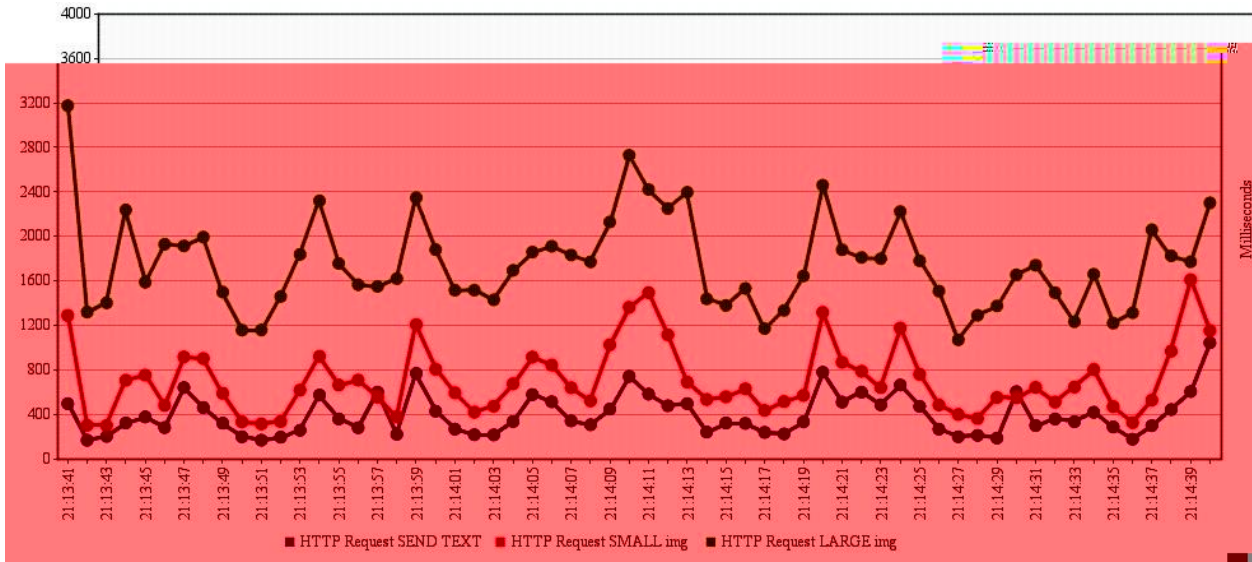

Technology

“NanoHTTPd” server

“Bridge” plugin 

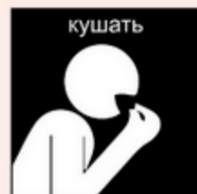

Test results

Samples' send-receive average times for different types of requests
