Federated storage initiatives at NRC "Kurchatov Institute"

Thursday 3 October 2019 15:45 (15 minutes)

Several R&D projects in Federated Storage techniques have emerged in the last years with a goal of exploring the evolution of distributed storage in Exabyte era, which is defined by storage demands of HL-LHC and several other international scientific collaborations. In this talk we will report on Federated Storage initiatives at NRC "Kurchatov Institute" including participation in the DataLake project and deployment of a storage federation for in-house computing resources.
