Wide-area networking for RDIG consortium: status update and plans

We present the current status of the wide-area networking for Russian RDIG/WLCG-sites in context of LH-COPN, LHCONE, research & educational networks: M/Light traffic exchange in Moscow, local and international links. Detailed traffic statistics and trends overview for the IPv4 and IPv6 traffic will be presented; they will be supplemented with the current policies and traffic handling methods. We will also talk about concrete plans for 2020 and network growth strategies for 2021-2022.
