The monitoring system of MICC-JINR

Tuesday, 5 July 2016 13:30 (15 minutes)

The development of the monitoring system of the Multifunctional Information and Computing Complex (MICC) of JINR is aimed at optimizing its work and at increasing the availability and reliability toward the absolute 100% level limit.

The monitoring is continuously improved such as to encompass all the existing hardware and primary software.

Suitable interfaces provide timely notifications, enable history-based predictions concerning the future M

This makes the JINR-LCG2 Tier2 and the JINR-CMS Tier1 sites amongst the most efficient ones within the WL

Primary authors: DOLBILOV, Andrey (JINR); KASHUNIN, Ivan (JINR); Dr STRIZH, Tatiana (JINR); MITSYN, Valery (JINR); Dr KORENKOV, Vladimir (JINR); TROFIMOV, Vladimir (JINR)

Presenter: KASHUNIN, Ivan (JINR)

Session Classification: 2. Operation, monitoring, optimization in distributed computing systems

Track Classification: 2. Operation, monitoring, optimization in distributed computing systems
