Heterogeneous cluster HybriLIT: New possibilities for the development of parallel applications

Monday 6 June 2016 10:00 (10 minutes)

The heterogeneous cluster HybriLIT is designed for the development of parallel applications and for carrying out parallel computations asked by a wide range of tasks arising in the scientific and applied research conducted by JINR. The efficient work on the cluster needs the implementation of an information-computing environment supporting the services provided to the users. The paper provides an overview of this environment.

Presenter: Ms TOROSYAN, Shushanik (LIT)
