Grid technologies at JINR

Monday 6 June 2016 11:20 (10 minutes)

Nowadays grid technologies are the key to success for large-scale projects. LHC accelerator with its physical installations is one of the directions where the distributed infrastructure for data processing comes in hand. In this report an overview of the grid infrastructure at JINR will be given. Some statistics will be brought up along with case studies of successful usage of grid technologies by institute's science groups.

Presenter: Mr VOYTISHIN, Nikolay (LIT)

Session Classification: Презентации участников
