

IX International Symposium on Exotic Nuclei

Russia, Petrozavodsk
September 10-15, 2018

PETROZAVODSK
2018
EXON

SECOND CIRCULAR

<http://exon2018.jinr.ru> & exon2018@jinr.ru

- TOPICS:**
- **Properties of light exotic nuclei**
 - **Superheavy elements. Synthesis and properties**
 - **Rare processes and decays**
 - **Radioactive beams. Production and research programs**
 - **Experimental facilities and future projects**

The organizers of the Symposium are: **FLNR JINR** (Dubna), **RIKEN** (Wako-shi), **GANIL** (Caen), **GSI** (Darmstadt), **NSCL** (Michigan) and **PetrSU** (Petrozavodsk Federal University).

Symposium will be held in Petrozavodsk (the capital city of the Republic of Karelia, Russia).

We hope that taking place in such an exotic region the Symposium will contribute to the success of productive work on exotic nuclei and will promote the collaboration of physicists from different countries.

The Symposium will be devoted to the investigation of nuclei in extreme states and, in particular, at the limits of nuclear stability (from very light neutron- and proton-rich up to superheavy nuclei).

The programme will include verbal (20 – 30 min) and poster presentations of contributed papers. It is expected that during the Symposium there will be enough time for informal meetings at which one can discuss future prospects of mutual collaboration of different scientific centers for performing joint investigations.
